Colors

Buttons are used for performing actions on the interface.

Common properties for buttons

Colors

Brand

Accessiblity: Skip navigation link has :focus

#F4F4F4

Headings

Any item that is marked with the caret down symbol, has a dropdown.

Search box

All dropdowns shall have the same look & feel. There may be exceptions as in <select> element.

When dropdown is displayed the item with the caret shall have the active status.

:active

Forms

We use a 12 column system with a gutter (space between two columns) of 16px.

Background colors

#C9C9C9

For accessibility all elements that have an action shall display by default the following style when the **:focus** status is active.

Textarea

Common properties for default texts

#961A49

Alerts

Mobile

Traffic light colors

Danger Button

The following are defined in UNICEF’s brand book:

#80BD41

We use the native font stack.

Partially filled

#374EA2

Input

#FFC20E

Disabled

Page backgrounds

For users that navigate with keyboard. Skip navigation link shall be provided. This link is only in a visible area when it has the focus.

Typography

2

App header with menu

text: Cursor for all active editable fields (input, textareas, etc..), as well as selecteble text.

Form with errors

Repeating links (e.g. in a list or a table) should not have an underline

Common properties for small texts

#FFC20E

#000000

Default width = 100% of container width.

Buttons and Links

Buttons with Icons

#F4F4F4

Common properties for headers:

All icons shall include a label as it is more accessible. Exceptionally, a :hover tooltip

Accessiblity: Skip navigation link has :focus (fixed header)

#767676

Fields with error

#6A3674

For vertical flow, we use by multiples of **0.5rem (8px)**. Each element total height shall be always a multiple of 8px or 0.5rem.

This document is in DRAFT status and may be subject to changes.

This document is mainly intended for internal use of UNICEF staff and partners.

Default Button

Without numbers

Labels use $default color $lighter color. Placeholder too. Both need to be accesible.

Fully empty (current _value <= 0)

Desktop >1024px

We will asume that the grid works the same way it does in the Bootstrap framework.

Columns are enclosed within containers. These are the containers for each breakpoints: sm: 540px, md: 720px, lg: 960px, xl: 1140px.

Tablet <= 1024px

Alerts appear as **result of an action**. Common properties for alerts:

default: It shall be the default cursor.

Links

Mobile buttons have a slighly large height to allow user to tap on them.

Grayscale

Dropdown menus

Forms

Field backgrounds

Navigation - Trees

These colors are used to represent status of an action or an element.

pointer: All clickable/actionable elements must have the hand cursor.
